- **TIPPLUS** has **ISO/9001:2008** QUALITY MANAGEMENT SYSTEMS CERTIFICATE
- **TIPPLUS** has customers ,they have **HIMSS Analytics EMRAM Stage 6 accreditation,**
- **TIPPLUS** is compatible with all of process about **HIMSS Analytics EMRAM**
- **TIPPLUS** HIMS , founded in 2004, has been providing the highest quality information systems and management services to the health care industry for more than 15 years. Our active, private ownership has remained focused on the company's guiding principles as we have grown to meet the support service needs of the nation's many medical facilities.
- Our approach is based on forming partnerships with our clients in order to tailor programs and softwares that address the unique needs of each facility and the priorities of each administration. We proactively manage all HIMS services, equipment, supplies, and staff. This allows our clients to concentrate on their core business: clinical healthcare.
- **Tipplus** HIMS is proud to have earned a reputation for excellence by consistently delivering resources and results that exceed our partners' expectations. We believe it is because of this commitment to quality that most of our business continues to come from referrals, the heart of any good business. We pledge to uphold this tradition by providing the highest quality hospital information and management services and by growing one satisfied customer at a time.

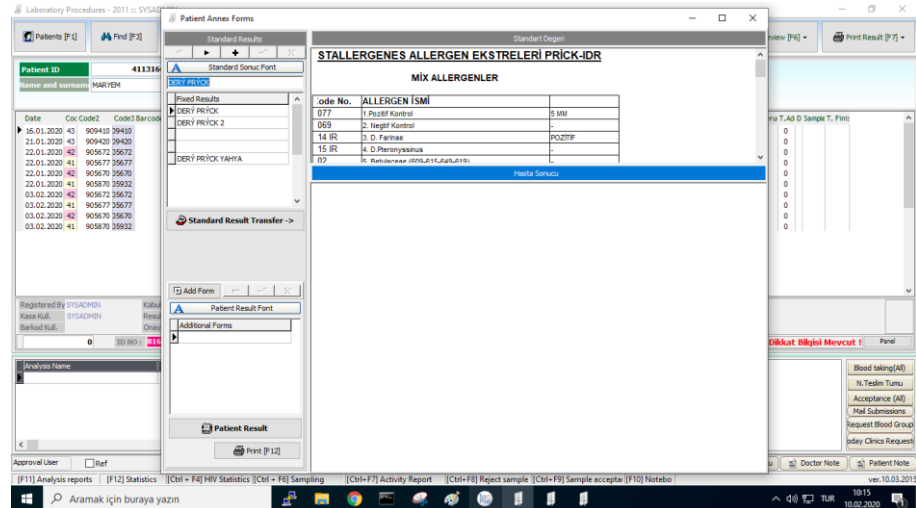

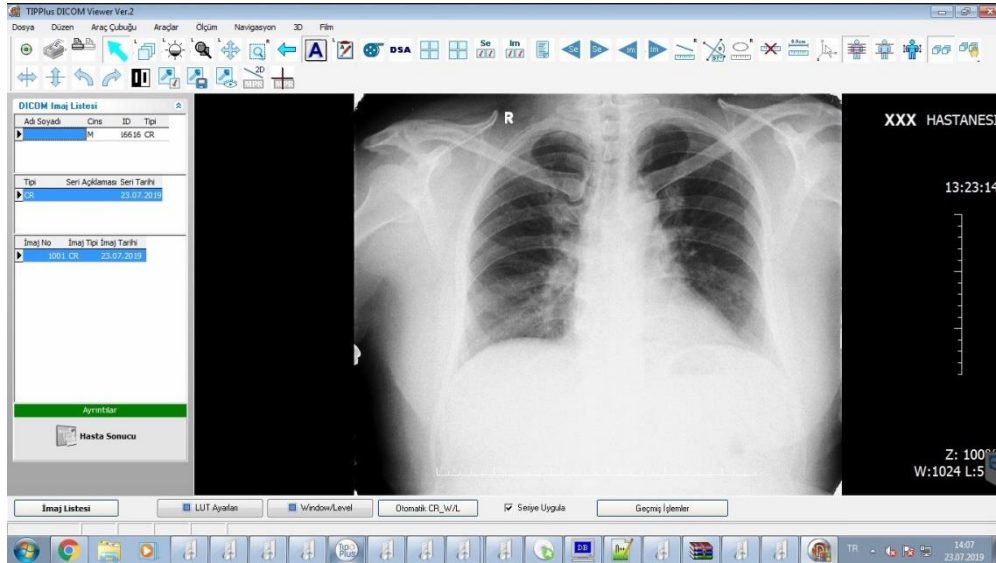

LINKAGE OF SYSTEM COMPONENTS CAPABILITY

- More than 400+ different brand and model laboratory equipment is integrated with the Tipplus LIS (Laboratory Information System).
- Tipplus LIS is a computer information system that manages laboratory information for all the laboratory disciplines such as clinical chemistry, hematology and microbiology.
- Laboratory Information Systems provide modules for sending laboratory tests order to the instruments through its multiple instrument interfaces, some are known as to have as many as five hundred, track those orders and then capturing the results as soon as they become available. The result can then be analysed and a report generated from it.
- This report can be sent off for printing at a specific point, sent off to other systems either to be added to patient's electronic medical record or for billing.
- Tipplus RIS (Radiology Information System) compatible with all DICOM 3.0 compliance device.
- Tipplus RIS includes PACS server and PACS viewer. Radiology, Doctor Polyclinic and Inpatient Modules includes PACS viewer.
- Tipplus HIMS has integrated with many brand phoropters, refractors, audiometers.
- Tipplus HIMS is a fully integrated Hospital Information System designed to provide a virtually paperless work environment in every department of your hospital.
- Tipplus HIMS also supported and collected a whole range of data in comprehensive or summary form, including demographics, medical history, medication and allergies, immunization status, laboratory test results, radiology images, vital signs, personal stats like age and weight, and billing information, etc.. All Modules can view this information, such as Doctor Polyclinic and Inpatient Module

LINKAGE OF SYSTEM COMPONENTS CAPABILITY

ADMINISTRATION

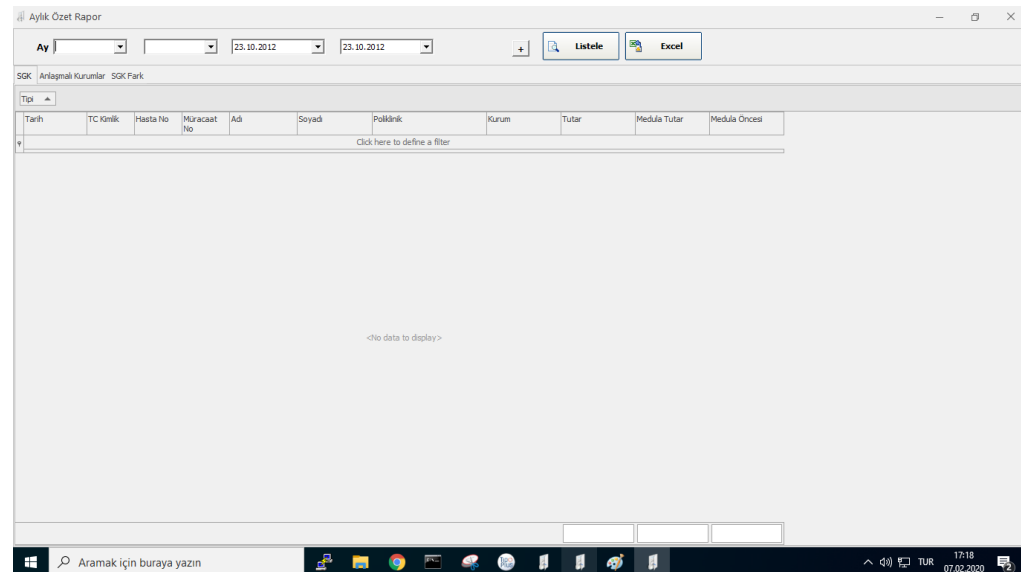

- The Management Information System (MIS) of Tipplus HIMS incorporates data cube technology to consolidate hospital information on critical attributes such as patients, doctors, people, products, departments and vendors. Tipplus HIMS creates an easy to interpret grid based snapshot with up to 10 years of reference data to assist hospital doctor owners take informed decisions.

Features:

- • View your hospital performance on over 1000 parameters
- • A measuring tool for your hospital to improve on cost savings
- • Plan products and services based on current and historic data
- • Take home analysis information on your laptop while you travel
- • Patient wait time and workflow analysis
- • Purchase trends and key supplier indicators
- • Doctor and department performance matrices
- • Room utilisation and revenue management
- • Patient loyalty index and spending patterns
- • People productivity and efficiency tracking
- • Create grid based what if scenarios using click and build queries
- • Presentation graphics for management and board meetings
- • Export query information to formats such as ms-word, openoffice etc
- • Optional integration with SPSS – Statistical data

SCHEDULING AND APPOINTMENTS

- The appointment module is the gateway of Tipplus HIS, allowing easy flow of outpatients, managing departments, appointments, doctor schedules, medical records etc. to reduce queuing at the clinics.
- Features:
 - • Integration of visit information with outpatient consulting
 - • Synchronise web data with pre-registration module
 - • Schedule doctor's timings on visit, duration, days and exceptions
 - • Create fee structures depending on the day, time, visit or physician
 - • Allocate appointment priorities for emergency cases
 - • Multiple and cross consultation during visits
 - • Patient visit validity on parameters such as visit and duration
 - • Exhaustive query system for easy retrieval of patient information
 - • SMS enabled patient booking
 - • Reduce waiting time for patient re-visits
 - • Forecasting of outpatients for a given day
 - • Booking for consultation and utility services.
 - • Enables telephone and SMS booking facility.
 - • Doctor / department wise booking of patients.
 - • Assign doctor wise booking limit for a day
 - • SMS alerts to doctors on booking information
 - • Block the booking of a doctor when out of station
 - • Collect booking fee at the time of booking or registration.
 - • Option to assign starting token numbers for each doctor

PERSONNEL

- Module enables employment history and performance appraisal management of hospital employees

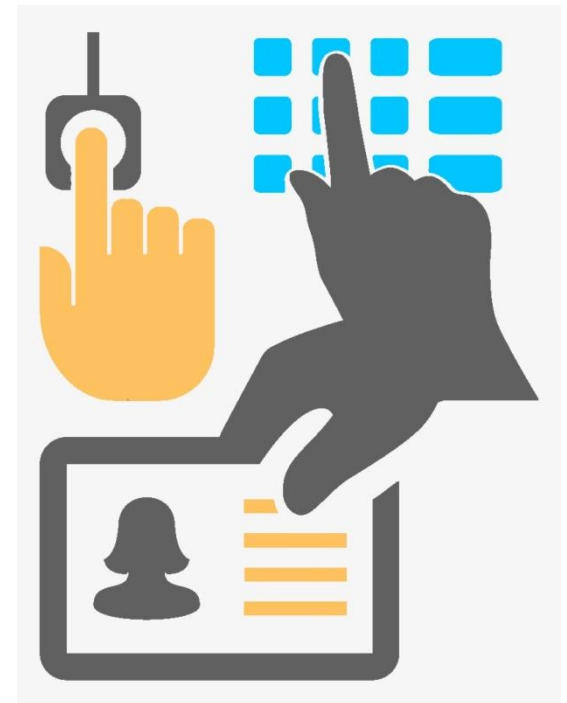

Features:

- Improve on hospital HR practices
- Increase employee retention
- Periodic employee appraisal parameters
- Employee confidential report
- Generate letter of appointment
- Security clearance Form
- Issue experience certificate
- Staff Joining Report
- Print employee id card
- Support different brand Time Attendance Hardware (Grading Based)
- And a lot more features

TIME ATTENDANCE

- Tipplus HIMS supports Time Attendance Hardware
- Finger Print Device
- Mifare or Proximity Card reader

ASSET MAINTENANCE MANAGEMENT

- Tipplus HIMS has Asset Maintenance Management Module

Features:

- • Savings through prompt renewal of insurance and warranty contracts
- • Minimizes the time and cost in maintenance of fixed assets
- • Bring about accountability in your equipment inventory
- • Improve control of planning and replacement costs of hospital assets
- • Depreciation chart calculation for asset (Fixed and diminishing method)
- • Facilitates easy tracking of locations of hospital equipments
- • Maintenance of manufacturer and supplier details
- • Tracking frequent breakdowns
- • Measurement of equipment repair costs

MEDICAL LIBRARY

The electronic medical records module of T1ppplus HIMS binds with the front office, patient care, laboratory, out patient consulting, laboratory, utility services and clinical departments to give the doctors and other service providers concise medical information.

Features:

- Patient medical information stored in database
- Exhaustive patient query system
- International Disease Code classification (ICD 10)
- DRG/DRG2 classification
- Templates for statutory reporting
- Professional format prescription printing
- Physical medical record file tracking

ADMISSION,DISCHARGE AND TRANSFER

- Professional looking patient discharge summary reports would help your hospital stand out from the crowd.
- The module in Tipplus HIMS allows creation, archival and retrieval of patient discharge summary records of all inpatients.
- Integrated with key supporting departments for single point reference to patient information.

Features:

- • Improve patient satisfaction through quicker hospital discharges
- • Ready to use templates for discharge summary
- • Choice of general and customised reporting
- • Access to hospital discharge information from doctors workstation
- • Laboratory investigation link to discharge summary
- • Prescribed medicine report in patient discharge summary
- • WYSIWYG formatting features included
- • Search and print previous discharge summaries
- • Export discharge summary to word / pdf formats
- • Supports ms-word and open office formats

NURSING

The patient care module of Tipplus HIMS efficiently tracks the end-to-end requirements of admitted patients of the hospital to provide better patient experience.

Features:

- • Create treatment packages to suite changing market requirements
- • Define rate slabs for products and services depending on the time of the day
- • Link physicians and para medics to wards
- • Input daily progress card
- • Automatic patient discharge summary
- • Consolidation of billing information from various departments
- • Credit limit for admitted patients
- • Monitor inpatient dues and send payment requests
- • and lot more

NURSING

[illegible][illegible]

SURGERY

The operation theater module, part of Tipplus HIMS allows efficient allocation of various resources required to perform surgeries in different operation theaters of the hospital.

Features:

- Keeps track of expensive theatre consumables
- Improve patient safety through safe procedures
- Bill of materials – reduces inventory and helps purchase planning
- Doctor wise surgery Scheduling to improve theater utilisation
- Surgical operational checklist for the day
- Operation theater equipment details
- Previous surgery records
- Scheduled theatre maintenance
- Theatre equipment inventory control
- And more

EMERGENCY

The emergency module of Tipplus HIMS is an innovative approach for doctors to handle their day to day emergency patients. The module interacts with various linking departments such as laboratory, pharmacy and front office for billing purposes, to reduce queuing at various billing points and improve on patient wait time.

Features:

- Drastic improvement in patient experience
- Improves department billing collections
- Interactive entry of patient information
- View previous visit details
- Check availability of medicines / alternate medicines
- Create prescriptions for a patient
- Clinical decision support system interface
- Prepare laboratory test and X-ray requests
- And lot more

LABORATORY

This is a comprehensive module to handle laboratory billing, reporting and reagent inventories. Talks directly with industry standard auto analysers and are integrated with out patient consulting and in patient billing modules of the Tipplus HIMS.

Features:

- Linked with central billing to prevent financial leakage
- Drastic reduction in kit and reagent wastage
- Third party tests for services which are done by external agencies
- Define duration for different tests and procedures to eliminate wait period
- Schedule laboratory services according to priority
- Work schedule for laboratory tests
- Integration with out patient consulting and ward billing
- Purchase orders for internal consumption
- Reduction in patient wait time at the laboratory
